Printing date 13.07.2015

Revision: 30.06.2015

SECTION 1: Identification of the substance/mixture and of the company/undertaking

For professional use only

· 1.1 Product identifier For professional use only

· Trade name: Craftmaster Paints - High Build Undercoat

- · 1.2 Relevant identified uses of the substance or mixture and uses advised against Surface Coating
- Application of the substance / the mixture
- Surface Coating
- Surface Coating

Use of the substance/preparation: Restricted to industrial and professional coatings, plastics and roadmarking.

Description of Uses: Formulation - Distribution and mixing pigment powder in an industrial environment into solvent-based paints for non-consumer use.

Use at industrial site - Industrial application of paints on metal surfaces (machines, vehicles, structures, signs, road furniture, coil coating)

Use by professional worker - Professional, non-consumer application of paints on metal surfaces (machines, vehicles, structures, signs, road furniture) or as road marking.

Service life (worker at industrial site) - Service life of coated articles.

Service life (professional worker) - Service life of coated articles

Formulation - Distribution and mixing pigment powder in an industrial environment into liquid or solid premix to colour plastic/plasticised articles.

Use at industrial site - Use of colour premixes and pre-compounds to colour plastic or plasticised articles for non-consumer use.

Service life (worker at industrial site) - Service life of coloured plastic or plasticised articles Service life (professional worker) - Service life of coloured plastic or plasticised articles

· Uses advised against

This product must not be used for decorative coatings, children's articles (including toys, paints, jewellery & equipment), consumer products, printing inks for consumer products, food and food packaging, drugs and medical devices, ceramics and glassware, cosmetics and tattoos.

Formulation of the pigment in paint, plastic and plasticised articles for children/consumer use. The use of the pigment is restricted in Annex XVII of REACH, entries 28 and 30.

1.3 Details of the supplier of the safety data sheet

Supplier: Craftmaster Paints Ltd

Acadamy Works Norman Way Ind Est Over Cambs CB24 5QE

· Further information obtainable from: Craftmaster

· 1.4 Emergency telephone number: 01954 231 308 (Office Hours)

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture
 Classification according to Regulation (EC) No 1272/2008

GHS02 flame

Flam. Aerosol 1 H222-H229 Extremely flammable aerosol. Pressurised container: May burst if heated. (Contd. on page 2) (GB

Printing date 13.07.2015

· 2.3 Other hazards

· Results of PBT and vPvB assessment

· PBT: Not applicable.

· vPvB: Not applicable.

SECTION 3: Composition/information on ingredients

- 3.2 Chemical characterisation: Mixtures

· Description: Mixture of substances listed below with nonhazardous additions.

Dangerous component CAS: 115-10-6	dimethyl ether	25-50%
EINECS: 204-065-8	Flam. Gas 1, H220; Press. Gas C, H280	25-5070
EC number: 919-446-0	Hydrocarbons C9-12 N-Alkanes, Isoakanes Cyclic Aromatics (2-25%) Flam. Liq. 3, H226; STOT RE 1, H372; Asp. Tox. 1, H304; Aquatic Chronic 2, H411; STOT SE 3, H336	10-25%
CAS: 1344-37-2 EINECS: 215-693-7	Lead sulfochromate yellow (PY34) Resp. Sens. 1, H334; Carc. 1B, H350; Repr. 1A, H360Df; STOT RE 2, H373; Aquatic Acute 1, H400; Aquatic Chronic 1, H410; Skin Sens. 1, H317	2.5-10%
CAS: 108-88-3 EINECS: 203-625-9	toluene Flam. Liq. 2, H225; S Repr. 2, H361d; STOT RE 2, H373; Asp. Tox. 1 H304; Skin Irrit. 2, H315; STOT SE 3, H336	2.5-10%
CAS: 123-86-4 EINECS: 204-658-1	Butyl ethanoate Flam. Liq. 3, H226; (1) STOT SE 3, H336	≤ 2.5%
CAS: 67-64-1 EINECS: 200-662-2	propan-2-one Flam. Liq. 2, H225; Eye Irrit. 2, H319; STOT SE 3, H336	≤ 2.5%
CAS: 108-65-6 EINECS: 203-603-9	2-methoxy-1-methylethyl acetate Flam. Liq. 3, H226	≤ 2.5%
CAS: 138-86-3 EINECS: 205-341-0	p-mentha-1,8(9)-diene Flam. Liq. 3, H226; Aquatic Acute 1, H400; Aquatic Chronic 1, H410; Skin Irrit. 2, H315; Skin Sens. 1, H317	≤ 2.5%
CAS: 96-29-7 EINECS: 202-496-6	2-butanone oxime	<u>≤</u> 2.5%

· Additional information: For the wording of the listed risk phrases refer to section 16.

SECTION 4: First aid measures

- 4.1 Description of first aid measures
- · After inhalation: Supply fresh air; consult doctor in case of complaints.
- · After skin contact:
- Immediately wash with water and soap and rinse thoroughly. Remove contaminated clothing.
- · After eye contact: Rinse opened eye for several minutes under running water.
- · After swallowing:
- Do not induce vomiting; call for medical help immediately and show safety datasheet or label.
- · 4.2 Most important symptoms and effects, both acute and delayed No further relevant information available.
- 4.3 Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

Printing date 13.07.2015

Revision: 30.06.2015

Product: Craftmaster Paints – High Build Undercoat

(Contd. of page 3)

Treatment: The presence of lead in the body can be detected by determining the amount of this substance in the blood and/or urine.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing agents:

CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.

· For safety reasons unsuitable extinguishing agents: Water with full jet

5.2 Special hazards arising from the substance or mixture

Reactivity: May be dissolved in strong acids or alkalis. In the event of a fire, oxides of lead, chromium and antimony may be generated.

5.3 Advice for firefighters

· Protective equipment: Put on breathing apparatus

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Wear protective equipment. Keep unprotected persons away.

· 6.2 Environmental precautions:

Inform respective authorities in case of seepage into water course or sewage system. Do not allow to enter sewers/ surface or ground water.

• 6.3 Methods and material for containment and cleaning up: Dispose contaminated material as waste according to item 13. Ensure adequate ventilation.

6.4 Reference to other sections

See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Ensure good ventilation/extraction at the workplace. Open and handle receptacle with care. Hygiene measures: Wash hands before breaks and at the end of workday. Use protective skin cream before handling the product.

• Information about fire - and explosion protection: Do not spray onto a naked flame or any incandescent material.

Keep ignition sources away - Do not smoke.

Protect against electrostatic charges.

Keep respiratory protective device available.

Pressurised container: protect from sunlight and do not expose to temperatures exceeding 50 °C, i.e. electric lights. Do not pierce or burn, even after use.

· 7.2 Conditions for safe storage, including any incompatibilities

Storage:

• **Requirements to be met by storerooms and receptacles:** Store in a cool location.

Observe official regulations on storing packagings with pressurised containers.

· Information about storage in one common storage facility: Not required.

Further information about storage conditions:

Keep receptacle tightly sealed and in a well-ventilated place. Keep away from heat. Do not seal receptacle gas tight.

Printing date 13.07.2015

Product: Craftmaster Paints – High Build Undercoat

(Contd. of page 4)

Revision: 30.06.2015

Store in cool, dry conditions in well sealed receptacles. Protect from heat and direct sunlight. • **7.3 Specific end use(s)** No further relevant information available.

SECTION 8: Exposure controls/personal protection

· Additional information about design of technical facilities: No further data; see item 7.

(Contd. of page 5)

- · 8.2 Exposure controls
- Personal protective equipment:
- General protective and hygienic measures:

Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing Wash hands before breaks and at the end of work. Store protective clothing separately.

- · Respiratory protection: When spraying the product, use a respiratory protective device.
- Protection of hands:

When skin exposure may occur, advice should be sought from the glove supplier on appropriate types and usage times for this product.

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

· Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

· Eye protection:

Tightly sealed goggles

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties		
• General Information • Appearance:		
Form:	Aerosol	
Colour:	According to product specification	
Odour:	Characteristic	
· Odour threshold:	Not determined.	
pH-value:	Not determined.	
Change in condition Melting point/Melting range: Boiling point/Boiling range:	Undetermined. -24 °C	
Flash point:	-42 °C	
Flammability (solid, gaseous):	Not applicable.	
Ignition temperature:	> 200 °C	
Decomposition temperature:	Not determined.	
Self-igniting:	Product is not selfigniting.	
Danger of explosion:	Heating may cause an explosion.

SECTION 10: Stability and reactivity

· 10.1 Reactivity No further relevant information available.

10.2 Chemical stability

· Thermal decomposition / conditions to be avoided: No decomposition if used according to specifications.

· 10.3 Possibility of hazardous reactions No dangerous reactions known.

· 10.4 Conditions to avoid No further relevant information available.

· 10.5 Incompatible materials: No further relevant information available.

10.6 Hazardous decomposition products:

Thermal decomposition or burning may release oxides of lead, chromium and antimony, toxic gases/vapours.

SECTION 11: Toxicological information

11.1 Information on toxicological effects

· Acute toxicity

LD/LC50 values relevant for classification:

1344-37-2 Lead sulfochromate yellow (PY34)

Oral LD50 >10000 mg/kg (rat)

Primary irritant effect:

· Skin corrosion/irritation Based on available data, the classification criteria are not met.

Serious eye damage/irritation Based on available data, the classification criteria are not met.

· Respiratory or skin sensitisation

May cause allergy or asthma symptoms or breathing difficulties if inhaled.

May cause an allergic skin reaction.

CMR effects (carcinogenity, mutagenicity and toxicity for reproduction)

· Germ cell mutagenicity Based on available data, the classification criteria are not met.

Carcinogenicity

The EC classifies C.I. Pigment Yellow 34 and C.I. Pigment Red 104 as carcinogenic category 1B. May cause cancer.

Reproductive toxicity

The EC classifies C.I. Pigment Yellow 34 and C.I. Pigment Red 104 as toxic for reproduction category 1A. May damage the unborn child. Suspected of damaging fertility.

Printing date 13.07.2015

Revision: 30.06.2015

Product: Craftmaster Paints – High Build Undercoat

(Contd. of page 7)

STOT-single exposure Based on available data, the classification criteria are not met.
STOT-repeated exposure
May cause damage to organs through prolonged or repeated exposure.
The EC classifies C.I. Pigment Yellow 34 and C.I. Pigment Red 104 as STOT repeated exposure Cat. 2 (route: oral, target organs: liver, kidney, nervous system).
LOAEL (oral, rat, 90 days)
1600 mg/kg bodyweight/day
NOAEL (oral, rat, 90 days)
288 mg/kg bodyweight/day
Causes damage to the central nervous system through prolonged or repeated exposure.
Aspiration hazard
May cause damage to the central nervous system through prolonged or repeated exposure.

May be fatal if swallowed and enters airways.

SECTION 12: Ecological information

12.1 Toxicity

• Aquatic toxicity: CAS No 1344-37-2 Lead sulphochromate & CAS No 12656-85-8 Lead chromate molybdate sulphate.

LC50 fishes 1 > 10000 mg/l Leuciscus idus 96h (test method comparable to OECD 203) EC50 Daphnia 1 > 100 mg/l Daphnia magna 48h (test method comparable to OECD 202) EC50 other aquatic organisms 1 > 100 mg/l Scenedesmus subspicatus 72h (OECD 201) LC50 fish 2 > 100 mg/kg Oncorhychus mykiss 96h EC50 other aquatic organisms 2 > 10000 ml/l Pseudomonas putida 30m NOEC (chronic) 0.7 mg/l Daphia magna 21d NOEC chronic fish 1 mg/l Pimephales promelas 60d NOEC (additional information) Ecotoxicity data based on tests on similar product. Acute Fish toxicity n-Butyl acetate LC50 18 mg/l Species: Pimephales promelas (fathead minnow) Exposure duration: 96 h

Chronic Fish toxicity n-Butyl acetate No data available.

Acute toxicity for daphnia n-Butyl acetate EC50 44 mg/l Species: Daphnia (water flea) Exposure duration: 48 h

Chronic toxicity to daphnia n-Butyl acetate NOEC 23 mg/l Species: Daphnia magna (Water flea) Exposure duration: 21 d Method: OECD Test Guideline 211

Acute toxicity for algae n-Butyl acetate EC50 675 mg/l Species: Scenedesmus quadricauda (Green algae) Exposure duration: 72 h

Acute bacterial toxicity EC50 356 mg/l Species: activated sludge

Printing date 13.07.2015

Revision: 30.06.2015

Product: Craftmaster Paints – High Build Undercoat

(Contd. of page 8)

Exposure duration: 40 h
12.2 Persistence and degradability No further relevant information available.
12.3 Bioaccumulative potential
CAS No 1344-37-2 Lead sulphochromate & CAS No 12656-85-8 Lead chromate molybdate sulphate.

Bioconcentration factor (BCF REACH) < 2000 Log Pow Not Applicable Log Kow Not Applicable Biococcumulative potential Due to the very low se

Bioaccumulative potential Due to the very low solubility of C. I. Pigment Yellow 34 in water the bioavailability of the substance is expected to be low. Therefore, the bioaccumulation potential of the substance is expected to be low.

- · 12.4 Mobility in soil No further relevant information available.
- · Ecotoxical effects:
- Remark: Toxic for fish
- · Additional ecological information:
- General notes:

Water hazard class 2 (German Regulation) (Self-assessment): hazardous for water Do not allow product to reach ground water, water course or sewage system. Danger to drinking water if even small quantities leak into the ground. Also poisonous for fish and plankton in water bodies. Toxic for aquatic organisms

Toxic for aquatic organisms

- 12.5 Results of PBT and vPvB assessment
- · PBT: Not applicable.
- · vPvB: Not applicable.
- · 12.6 Other adverse effects No further relevant information available.

SECTION 13: Disposal considerations

- · 13.1 Waste treatment methods
- · Recommendation

Must not be disposed together with household garbage. Do not allow product to reach sewage system.

Uncleaned packaging:

Recommendation: Disposal must be made according to official regulations.

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

· Directive 2012/18/EU

· Named dangerous substances - ANNEX I None of the ingredients is listed.

Printing date 13.07.2015

Revision: 30.06.2015

Product: Craftmaster Paints – High Build Undercoat

(Contd. of page 10)

· National regulations:

· Information about limitation of use:

Workers are not allowed to be exposed to the hazardous carcinogenic materials contained in this preparation. Exceptions can be made by the authorities in certain cases.

· Technical instructions (air):

Class	Share in %
Ι	0.1
II	6.2
NK	57.4

· Waterhazard class: Water hazard class 2 (Self-assessment): hazardous for water.

Other regulations, limitations and prohibitive regulations

Substances of very high concern (SVHC) according to REACH, Article 57

REACH Candidate List (Substance of Very High Concern): C.I. Pigment Red 104 has been added to the "Candidate List" of Substances of Very High Concern (SVHC).

REACH ANNEX XIV: C.I. Pigment Yellow 34 is listed in Annex XIV of Regulation (EC) 1907/2006.

REACH ANNEX XVII: The use of the pigment is restricted in Annex XVII of REACH, entries 28 and 30.

Directive 2004/37/EC: Protection of workers from the risks related to exposure to carcinogens or mutagens at work

Directive 92/85/EEC: Protection of pregnant workers and workers who have recently given birth or are breastfeeding

Directive 94/33/EC: Minimum requirements for the protection of young people at work

Regional legislation: Labelling in accordance with Regulation (EC) No. 1272/2008 on classification, labelling and packaging of substances and mixtures.

1344-37-2 Lead sulfochromate yellow (PY34)

· 15.2 Chemical safety assessment: A Chemical Safety Assessment has not been carried out.

SECTION 16: Other information

This information is based on our present knowledge. However, this shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

Respiratory Sensitisation: Based on the available case reports such as the European Union Risk Assessment Report (RAR), it is concluded that hexavalent chromium compounds can cause occupational asthma and respiratory sensitisation. As Cr (VI) is a transformation product of this pigment, this information can be read across to address the respiratory sensitising potential of C.I. Pigment Yellow 34. The likelihood of respiratory sensitization of C.I. Pigment Yellow 34 is however considered very low due to very poor bioavailability. No information is available for C.I. Pigment Yellow 34.

Skin sensitisation: Available information for hexavalent chromium, Cr (VI), including the European Union Risk Assessment Report (RAR), can be read across to address the skin sensitising potential of C.I. Pigment Yellow 34. It can be assumed that the skin sensitising properties of this transformation product Cr (VI) can be held responsible for the skin sensitising potential of the pigment. The likelihood of skin sensitization of C.I. Pigment Yellow 34 is however considered very low due to very poor bioavailability. No information is available for C.I. Pigment Yellow 34.

Carcinogenicity: As noted in the OSHA Lead Standard, repeated and prolonged exposures may cause delayed effects involving the blood, gastro-intestinal, nervous and reproductive systems. Chronic overexposure may cause effects of chronic lead toxicity. "Chromium and certain chromium compounds" are currently classified by IARC (Group 2B) as possible carcinogens but it is stipulated that 'the compound(s) responsible for the carcinogenic effect in humans cannot be specified'. ACGIH currently lists 'chromates of lead' as 'substances suspect of carcinogenic potential for man' (see appendix A2 of ACGIH TLV booklet). EPA's health assessment document for chromium states that 'animal cancer bioassay studies suggest that hexavalent chromium compounds (particularly soluble and sparingly soluble compounds) are probably the etiological agent in chromium related human cancer. Data supporting this position exists in both rats and humans. Rat bronchial implant studies have shown that only calcium, strontium and zinc chromates produced statistically significant increases in the numbers of bronchial carcinomas while no such increases were seen with seven different

(Contd. of page 11)

samples of lead chromate pigments (Levy et al., 1986). All hexavalent chromium compounds (including lead chromates) are considered to be suspect human carcinogens. However, available epidemiological evidence on C.I. Pigment Yellow 34 and C.I. Pigment Red 104 does not confirm this position. In every case where excess lung cancer incidences have been reported, exposure was either to zinc chromate alone or involved mixed exposures to various combinations of zinc, lead, strontium and barium chromates. In the studies where exposure was reported to be C.I. Pigment Yellow 34 and C.I. Pigment Red 104 alone, no increased incidence in lung cancer was observed.

· Relevant phrases

H220 Extremely flammable gas.

- H225 Highly flammable liquid and vapour.
- H226 Flammable liquid and vapour.
- H280 Contains gas under pressure; may explode if heated.
- H304 May be fatal if swallowed and enters airways.
- H312 Harmful in contact with skin.
- H315 Causes skin irritation.
- H317 May cause an allergic skin reaction.
- H318 Causes serious eye damage.
- H319 Causes serious eye irritation.
- H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.
- H336 May cause drowsiness or dizziness.
- H350 May cause cancer.
- H351 Suspected of causing cancer.
- H360Df May damage the unborn child. Suspected of damaging fertility.
- H361d Suspected of damaging the unborn child.
- H372 Causes damage to the central nervous system through prolonged or repeated exposure.
- H373 May cause damage to the central nervous system through prolonged or repeated exposure.
- H400 Very toxic to aquatic life.
- H410 Very toxic to aquatic life with long lasting effects.
- H411 Toxic to aquatic life with long lasting effects.
