

Product Information:

## **WORKSHOP PRO SEMI-SYNTHETIC CHAIN LUBRICANT**

### **Description:**

Workshop Pro Semi-synthetic Chain Lubricant is a specially formulated aerosol designed for the protection of chains used in a variety of applications. This product is initially a thin flowing lubricant which when sprayed, searches and penetrates into the chain links and rollers. Within a few minutes the solvent carrier 'flashes off' and the product thickens and provides a strong, cushioning and lubricating, grease like coating on all parts. This coating has powerful anti-fling properties and is not displaced by the fast movement of the chain. Chain and sprocket wear is reduced to a minimum by the lubricant coating.

### **Features:**

- Highly tenacious
- Precise application through nozzle
- Excellent corrosion protection

### **Applications:**

Workshop Pro Semi-synthetic Chain Lubricant is recommended for use on motorcycle chains, lift and drive chains, leaf and roller chains, conveyor system chains, et cetera.

### **Notes on Usage:**

*Light treatment is highly recommended as part of regular routine maintenance. The film produced is clear, but highly tenacious and therefore, excessive application of the product should be avoided.*

### **Physical Characteristics:**

After Solvent Evaporation

Appearance	Pale Amber fluid
Relative Density @ 15.6°C	0.905
Kinematic Viscosity @ 100°C (cSt)	2100
Closed Flash Point °C	145
